INVESTMENT PHILOSOPHY

We believe that an investment strategy based on the best available evidence and thoughtfully implemented using a disciplined, systematic process will produce superior long-term results.

Decades of rigorous academic research have identified value, momentum, low volatility, and low turnover factors as persistent long-term sources of return. Our multifactor portfolios are designed to harness these important factors to consistently outperform the broad market in the long run.

We are also fully committed to bringing glory to God through biblically responsible investing. We are thankful that the Lord has graciously blessed our efforts so far.

N.A. - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year or an insufficient period of time. / * - Results shown for the year 2015 represent partial period performance from July 1, 2015 through December 31, 2015.

Stewardship Partners Investment Counsel, Inc. claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Stewardship Partners Investment Counsel, Inc. is an independent registered investment adviser. The firm maintains a complete list and description of composites, which is available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of at least 10% of portfolio assets unless it is the only portfolio in the composite. The MSCI AC World ex USA Index uses withholding tax rates applicable to Luxembourg. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Composite returns represent investors domiciled in the United States. Returns include the effect of foreign currency exchange rates. Prior to January 1, 2018, the composite was known as the International Quantitative BRI Equity Composite.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of fees and include the reinvestment of all income. Gross returns are net of trading expenses. Net returns are net of investment management fees and trading expenses. This composite includes non-fee-paying accounts. The annual composite dispersion is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The standard investment management fee schedule is as follows: 1.00% annually. Actual investment advisory fees incurred by clients may vary. The International Multifactor Equity Composite was created July 1, 2015. Past performance is no guarantee of future results.
